Attached is the modified Region 6 Plan as approved at our RPC meeting this afternoon. The plan modification incorporates the elements required by FCC 14-172. In the San Francisco Bay Area UHF T-Band zone all 24 former reserve channels will be made available for general use under the guidelines identified in the FCC ruling. Outside of the UHF T-Band zone Region 6 is allocating the 6 channels for Deployable Trunked Systems as identified by the FCC and the remaining 18 former Reserve Channels will be allocated for general use (floating assignment) with the restriction that the geographically allocated channels be used first before requesting former Reserve Channels. Region 6 will not allocate specific channels for MO3 use.

In addition to the changes to incorporate 14-172, minor edits were made to correct Table of Content titles, add a missing reference to a neighboring region and correct a section cross reference error. All changes are highlighted in yellow.

Please let me know if you have any questions.

Thanks

Re: Letter of Concurrence for modification of Region 6 Oregon 700 MHz Plan

The Public Safety Region 35, Oregon, 700 MHz Regional Planning Committee has reviewed the modified Region 6 (Northern California) Public Safety 700 MHz Plan, dated October 8, 2015 incorporating changes as required by Federal Communications Commission Report and Order 14-172 dated October 24, 2014. Region 35 concurs with the changes.

Sincerely

A handwritten signature in black ink, appearing to read "John Hartsock", written in a cursive style.
